

Andy Hoffman

Remote (EST) / 215.620.4900 / andy@andyhoffman.codes

Summary

Startup-minded front-end specialist with over 20 years experience deploying code that scales across teams, complex domains, and accessibility requirements. Full-stack fluency, published author, and expert in React, TypeScript, HTML and CSS.

Core Skills

Claude · Cursor · MCP · React · Next.js · TypeScript · Prompt Engineering · GraphQL · Node.js · WebSocket API · Wagmi · Viem · Tailwind · Git/GitHub · Cypress/Jest · Design Systems · WCAG Accessibility · PostgreSQL · MySQL · SQLite · Figma

Experience

Senior Front-End Lead — Fabrica · 11/2022 – Current

- Architected the entire front-end for a real estate blockchain platform, creating interfaces that make tokenization and crypto transactions straightforward for everyday users.
- Built interactive, animated Mapbox visualizations for exploring and analyzing land data, enabling intuitive navigation of complex geospatial datasets.
- Worked directly with founders, designers, and back-end engineers to shape features—from API design to interaction patterns to what we can realistically ship.
- Made front-end architecture decisions from state management to API integration strategy, building a codebase that's organized enough to scale but pragmatic enough to ship quickly.

Senior Front-End Lead — Opolis · 10/2021 – 8/2022

- Built a custom React component library from scratch that became the foundation for all product teams, eliminating design inconsistencies and cutting feature delivery time across the company.
- Architected the front-end for a cryptocurrency payroll platform processing millions in multi-currency transactions, handling complex tax calculations and payment flows through clean, reliable UI.
- Led the technical strategy for onboarding and enrollment flows that directly contributed to user growth, working closely with product to balance conversion optimization with regulatory requirements.

Senior Front-End Lead — M Science · 3/2020 – 10/2021

- Led the design and development of a new customer portal from scratch, collaborating with product and back-end teams to ship a platform that increased customer engagement by 40%.
- Established front-end testing and accessibility standards across the engineering organization, implementing Cypress/Jest workflows and WCAG compliance that improved code quality and reduced production bugs.
- Mentored developers on modern React patterns, accessible design principles, and component architecture, raising the team's front-end capabilities as the company scaled.

Shopify Lead / Analyst — PFSweb · Remote · 2/2018 – 3/2020

- Designed React-based WCAG accessibility utilities for enterprise e-commerce projects.

- Engineered scalable Shopify theme development architecture used across distributed teams.
- Delivered responsive, accessible experiences for international brands.

JavaScript Developer (Contract) — PlanetScale · *Remote Contractor* · 4/2019 – 8/2019

- Enhanced company site with new React features and accessibility improvements.
- Completed Gatsby v2 migration.

Shopify Theme Developer — Troop Themes · *Remote* · 9/2016 – 11/2017

- Developed and published responsive, accessible Shopify themes built for high traffic.
- Automated workflows to improve accessibility and web performance metrics.

Front-End Accessibility Lead — IBM · *Pittsburgh, PA* · 4/2013 – 9/2016

- Achieved full WCAG 2.0 AA compliance across core products.
- Led front-end development for IBM Watson's web platform.
- Engineered 60 FPS UI animations and optimized performance for enterprise-scale user experiences.

Education

University of Pittsburgh, 2000-2003, Computer Science

Montgomery County Community College, 2000, Cum Laude
