Summary

Senior front-end engineer with 20+ years of experience building scalable web applications across real estate, fintech and SaaS domains. Specializes in React, TypeScript, Next.js and AI-driven workflows with a strong track record of WCAG accessibility compliance at scale. Seeking a senior front-end engineer role where I can architect modern systems or migrate aging codebases.

Core Skills

React 19 · Next.js 16 · TypeScript · GraphQL · Apollo Client · Node.js · WebSocket API · Claude · Cursor · MCP · Wagmi · Viem · Tailwind 4 · Git/GitHub · Cypress/Jest/Vitest · Design Systems · WCAG Accessibility · PostgreSQL · MySQL · Prisma · SQLite · Figma

Experience

Senior Front-End Lead — Fabrica · 11/2022 – 6/2026

- Migrated existing Next.js Pages Router architecture to App Router. Converted existing React components to server components (RSCs) to increase performance via caching and SSG strategies. Added client components where direct client interaction was required.
- Used Playwright MCP for regression testing against critical product paths. Tested features in an actual browser and gated code commits on the success of these paths.
- Leveraged GraphQL subscriptions via Apollo Client with Server Actions for multi-step, real-time user onboarding.
- Created a weekly AI workflow task that checked WCAG accessibility and prevented regressions.

Senior Front-End Lead — Opolis · 10/2021 – 8/2022

- Built a custom React 18 component library that became the foundation for all product teams, promoting reusable components across the company.
- Introduced Vercel feature flags into the deployment workflow, decoupling releases from deployments and enabling gradual rollouts that de-risked shipping new functionality.
- Created a secure crypto payroll system which handled multi-million dollar transactions using Viem/Wagmi.

Senior Front-End Lead — M Science · 3/2020 – 10/2021

- Built and architected a new customer portal used exclusively by high net worth traders and data engineers.
- Used Sentry to trace and resolve production issues, correlating error reports with release versions and user sessions to prioritize fixes.
- Mentored developers in modern React, accessibility, and end-to-end testing strategies.
- Led weekly product deployments across multiple products.

Shopify Lead / Analyst — PFSweb · Remote · 2/2018 – 3/2020

- Designed React-based WCAG accessibility utilities for enterprise e-commerce projects.
- Engineered scalable Shopify theme development architecture used across distributed teams.
- Used Contentful for custom blog integration across multiple client projects. Clients could manage their content and delivery schedule without any code changes.

Shopify Theme Developer — Troop Themes · Remote · 9/2016 – 11/2017

- Developed a custom theme from scratch which was featured on Shopify homepage.
- Automated workflows to improve accessibility and web performance metrics.

Front-End Accessibility Lead — IBM · Pittsburgh, PA · 4/2013 – 9/2016

- Led front-end development for IBM Watson's web platform, achieving full WCAG 2.0 AA compliance across core products.
- Deeply tested the core product against modern screen readers.
- Mentored both engineering and QA teams on accessibility best practices and added an accessibility scan to our CI/CD pipeline to ensure future success.

Education

University of Pittsburgh, 2000-2003, Associate Degree in Computer Science
